Go Solar before NEM 2.0 ENDS!

Get Grandfathered into NEM 2.0 for 20 years!

What Current Solar Customers Can Expect with NEM 3

- No changes to your current plan, unless you add panels after NEM-3
- Customers can add backup batteries at anytime, without effecting NEM status
- If you want to add panels a pre-existing system, it is recommended to do so by the end of Feb to ensure you meet the deadline

NEM 3 UPDATE:

NEM 2.0 is coming to an end! The value of solar exports will decrease dramatically starting in April 2023. By getting grandfathered into NEM 2.0, you will be able to lock your home's buyback rates for the next 20 years.

The financial incentives will drop by 75% for NEM 3 customers. The ROI will be close to double the amount of time for the payback period. To get the most out of your solar exports, act now!

What New Solar Customers Can Expect with NEM 3

- When you sell energy into the grid your rates will be credited at an average of close to 7 cents per kWh instead of what is currently being credited at an average of 40 cents per kWh
- These changes would require customers to be on electrification rates (E-ELEC, TOU-PRIME, EV-TOU-5), which have monthly charges of \$14-\$16.

CONVENTIONAL vs. SUNPOWER

TESTIMONIALS

What are the most important aspects of an excellent solar experience?

Conventional Solar Panels
10 kW

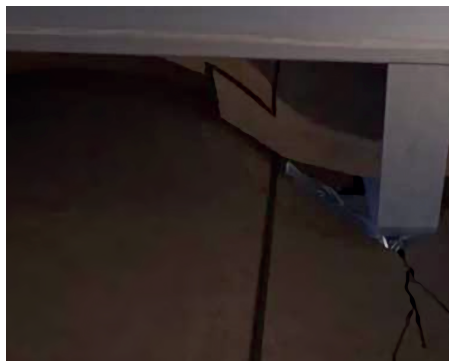

More Energy In Less Space

SunPower® Panels
10 kW

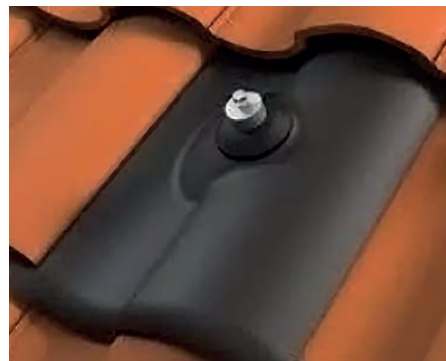

2 OPPOSITE CHOICES: CHEAPEST vs. BEST

CONVENTIONAL

The more intrusion, the more likely it is for the roof will develop cracks or leaks.

SUNPOWER

Minimal intrusions keep the roof impervious to leaks. We offer the best mounting hardware products.

MOUNTING HARDWARE will provide the greatest PEACE OF MIND for roof integrity long term.

"Owning solar is just like owning a car. However, in the car market there are a lot of cars. Most solar companies are like Honda - great to get you from A to B, but not as

good as a Mercedes. Solar Bill is the Mercedes of Solar. The explanations and experience have been top notch. Although there was a supply chain delay, we were kept informed and all our questions answered with integrity and honesty. The team was fantastic in meeting our needs and working with other members of our families who also got solar. At the end, we have a sleek solar that is aesthetically pleasing and performing beyond the promise. If you want an easy satisfactory experience that results in superior product, go with Solar Bill ..."

Jay W.

"Had a great experience with everyone involved in our solar installation, especially Adrian and Leah, but also the installers from SunPower. Really appreciated SBR's follow up a year later to go over the NEM billing which can be confusing. The recommended size was perfect and our true-up was just a little bit negative so we paid nothing beyond required monthly fees."

"I got my solar thru Solar bill review last year and great to work with. Jon helped me understand every lines on the bill after my solar up and running, gave me idea and suggestion for my electric usage.... very good pricing and customer service, so far I have nothing but good experience with them."

Tao X.
