## Equipment

### Solar Panels

- SunPower is known as the only American panel company to outlive the warranty.
- Knowing the difference between good, better and best may be the difference between a great experience or not.
- Why not learn the differences?

### Home Energy Storage

- Get the real value of the energy you create when you want to use it.
- Keep the lights on when grid goes down.
- Reduce peak-time charges.

### Why use the best Vs. cheapest mounting hardware?

Quality mounting hardware will provide the greatest peace of mind for your roof's long-term integrity.

When you go for the cheapest solar installation experience, guess what happens?

## Why rent from PG&E's outdated dangerous technology?

**California Leads the Nation 1,723,844 Solar Projects Installed**  
[www.californiadgstats.ca.gov](http://www.californiadgstats.ca.gov)

### Passive with PG&E?

- Starting fires
- More expensive
- 100 year old infrastructure
- Rate increases out of control

*If a \$60 electric bill has become over \$150 within the last 10 years, what will your \$150 electric bill become in just five years?*

### Why Go Solar?

- Invest in future of family instead
- Lower monthly cost
- Predictable fixed cost
- Control when you have power
- Safer

*Almost 50% of California homeowners have gone solar. What are you waiting for?*

I have had review sessions with a few more solar companies where the selling point is mostly about solar being the future / rebates and that in general it saves for costs in the long run (wisely used), they didn't personalize the discussions that close to what this team did. A very clear process detailing the next steps, periodical communication throughout the phases, quick installation and guidances are a plus. Lastly, it doesn't get over with just installation, rather they have periodic reviews 3 / 6 months down the line to ensure what was on the contract was something that is rightly getting delivered (so we get the right benefits as expected) and they also give ideas on how to best maximize on this investment to solar.

...thoughtful, thorough, and ensured that we were properly supported. In reflection of the end-to-end process, the installation of our 28 panels was a low-lift and seamless process. Their communication was frequent during our project, and if we had any questions, they ensured it was addressed immediately. After installing our panels, they stayed in close contact to ensure we were satisfied. Furthermore, they scheduled time to review the solar functionality, which includes a PG&E bill overview. We will also meet next year to review the continued solar production and any NEW charges.

...Honest, works to get you the best quality at the best price, is great with follow up, and very responsive to emails and questions. Especially thankful for Solar Bill Review Team, which keeps up with me after solar panels are installed to make sure I understand my bill and also to monitor my bill with me. highly recommend. Completed in 2020 looking forward to conserving energy and saving \$
