# Testimonials

I worked with Adrian and the team at Solar Bill Review to get solar installed at my home in Oakland. I was committed to getting solar but uncertain about how/who to use to get it installed. Adrian and his team were so helpful throughout the entire process from the design phase through installation and then ensuring I understood how to monitor usage and performance going forward. I couldn't be more happy with not just my decision to go solar but to work with Adrian and Solar Bill Review. I can't imagine having to navigate this entire process on my own had I gone with a different solar provider that doesn't offer the services of Adrian and Solar Bill Review.

Bill and his team are awesome. They constantly keep in touch with you after installation to make sure you are happy with the services. Its been years since i had my solar from Bill but i get a call every year to go over my PGE statement to make sure i understand my bill and how i'm maximizing my usage. I highly recommend their service.

I worked with Adrian and the team to install the rooftop solar. The team did an outstanding job explaining all the options, creating a plan based on billing history and working with Sun Power getting the project to completion. They were on top of the things including Bill review once the solar was installed. Highly recommend Solar Bill Review if you are looking to go Solar.

## Why rent from PG&E's outdated dangerous technology?

### PG&E

- More expensive
- Continuous rate increases
- 100 year old infrastructure
- Starting fires
- Rolling Blackouts

### SOLAR

- Invest in your home's value
- Predictable fixed cost
- Lower monthly cost
- Safer equipment
- Control over your power
